Obiettivo formativo

Define a complete, measurable, and academically usable internship project.

ConI, ammissibilità e responsabilità

Standard Intel proposals are intended for students actively enrolled, at the moment of application and activation, in a European university or equivalent recognised higher-education institution. Non-standard cases require separate legal review before acceptance.

Every candidate must read the current ConI Internship Agreement before submitting a final application. ConI governs responsibilities, insurance, academic activation, confidentiality, intellectual-property access, and the distinction between an educational internship and employment.

Profilo della partecipante

Student enrolled in a relevant university programme, with sufficient technical autonomy for the activities listed below and with insurance/activation handled by the promoting entity.

Piano operativo

The detailed work plan is defined in the filled project instance. The hours must add up to the total expected hours and must correspond to the ECTS/CFU value declared above.

Fase	Attività	Ore / quota
1	Define project phases, evidence, and deliverables in the filled project instance.	0

Risultati ed elementi di valutazione

Project deliverables are defined in the filled project instance.

Limiti operativi e di sicurezza

This proposal does not constitute employment and does not replace a student-specific internship agreement, university convention, insurance confirmation, or any mandatory public filing.

Future Collaboration Path

A successful internship may lead to future personal or professional collaboration, where legally and academically compatible.
