

Unpopulated specimen

Complete document for reviewing structure and default values; it is not intended for execution.

The Italian text is the official version; English is a courtesy translation. Completed copies contain personal data and protected-access references.

This form is a bilateral agreement ancillary to an effective Reference Agreement that includes Att. M. It governs only the movable asset identified below and, once every condition is satisfied, constitutes the Specific Authorisation required by Att. M and the related gratuitous loan under Arts. 1803 et seq. of the Italian Civil Code. It does not amend Att. M, Att. R, or Att. F and grants no access to real estate, areas or systems beyond the applicable separate instrument.

Parties and document integration

Lender ColivingLiguria S.r.l.
Registered office Strada Chiappella, 21, 17014 Cairo Montenotte (SV), Italy
VAT / Tax code 01939660096
PEC colivingliguria@pec.it

Reference Agreement code _____
Tool1 code _____
Reference Agreement status ☐ already effective

Attachment M included ☐ confirmed

Integration mode: ☐ bilaterally executed addendum following an already effective Reference Agreement and Attachment M. A specimen or pre-populated copy enclosed with the initial package is solely for preparing a future request and may not be executed or create any authorisation before the Reference Agreement and Att. M become effective.

User / borrower _____

Birth _____

Tax code _____

Residence _____

Identity document _____

Contact _____

Place and date _____

Exact asset identification

Asset code _____

Description _____

Manufacturer _____

Model / variant _____

Serial number _____

Nameplate evidence ☐ present ☐ not present, absence verified _____

Internal label _____

☐ The physical asset delivered matches the asset code, manufacturer, model/variant and nameplate recorded above.

☐ The internal label is applied, legible and refers to the same asset.

☐ The Signatory is an adult. Standard Tool1 does not authorise use by minors.

Applicable official manual and protected access

Official title _____

Document code _____

Revision / issue date _____

Language _____

Official source _____

SHA-256 _____

Private access _____

Access granted at _____

☐ The manual title, code, revision and model scope have been verified as an exact match for the physical asset.

☐ The Signatory confirms having received access to the copy identified by the fingerprint above and having read it in full before handover.

☐ The Signatory confirms that the language and content of the instructions are understandable and undertakes to seek clarification and not use the asset while any operational or safety doubt remains.

Current inspection

Outcome ☐ fit and current

Record _____

Verified inspector _____

Performed at _____

Next due at _____

☐ The inspection is current and covers the full period through the scheduled return; any defect, recall, expiry or material change immediately suspends use.

1. Nature, gratuitous character and effectiveness conditions

The Company delivers the asset identified above free of charge for the use determined in this form, subject to return of the same asset. No rent or consideration is due for use; consumables, electricity and security follow only the express choices in clause 5. Authorisation becomes effective only after: physical and nameplate verification; exact and accessible manual; current inspection; applicable training, PPE and supervision; execution by both Parties; availability of a separate lawful instrument granting access to the place; and crediting of any additional security deposit. If any condition is missing, the asset must not be used. No catalogue, register, purchase document, physical availability, undocumented handover, oral communication or tolerated conduct replaces these conditions.

2. Scope, place, time and personal use

Permitted purpose

Permitted operations

Expressly prohibited uses

Exact place / area

Authorised start

Authorised end

Specific reason for the request

The Signatory describes the personal project, the concrete intended result, the materials involved, and why the identified asset is necessary. Generic phrases such as “DIY” or “personal project” are insufficient. The reason is a contractual request concerning intended future use and is not a statutory self-certification.

The Signatory may personally use the asset only for the operations, at the place and during the period stated above, in accordance with the manual and Att. M. Lending, sub-loan, delivery, trial or use by third parties is prohibited, as are modifications, removal of guards, unauthorised repairs, use on unlisted materials, systems or activities, and transport outside the authorised place. Any extension requires a new final Tool1 or an equally specific bilateral addendum. The stated period creates no real-estate access instrument and does not authorise presence at the place beyond the applicable separate instrument.

3. PPE, stated experience, competence, training and supervision

Experience stated by the Signatory: ☐ no prior experience ☐ limited experience ☐ documented or demonstrated experience.

Contractual statement concerning experience facts

The Signatory states only facts personally known to them: dates or periods, contexts, identical or comparable tools, operations previously performed, training received, and any incidents or limitations. If there is no prior experience, this must be stated expressly. The statement is exclusively contractual, supports the Company’s assessment, and neither grants nor proves technical fitness, qualifications, asset conformity, or absence of risk; it remains separate from the prospective reason for the request.

Optional evidence or references

☐ The Signatory confirms that the preceding description is made as a contractual statement, is complete and truthful according to facts personally known, and expressly identifies any relevant uncertainty, limitation, or absence of experience.

Mandatory PPE

PPE source

Verified competence

Training / briefing evidence

Completed at

Supervision

Supervisor

Coverage / attendance

The Signatory’s contractual statement is solely an assessment element. “Verified competence”, briefing, a practical test, and any supervision are Company assessments and measures and cannot be replaced by the statement alone. Where experience is absent or limited, Tool1 may become final only with mandatory supervision and any additional measures set by the Company.

☐ The Signatory confirms understanding the instructions, residual risks, pre-use checks, emergency stop and duty to stop if there is doubt, a defect, missing PPE or a condition different from that verified. Recorded training applies only to the asset and scope identified above.

4. Handover, custody and return

Handover

Condition at handover

Accessories and quantities

Photographic / record evidence

Scheduled return by

Handover data are completed and verified in the controlled transaction immediately before physical transfer of the asset. The Signatory signs a copy

that already contains the final date and time, condition, accessories and evidence; the Company applies its qualified/digital electronic signature before or simultaneously with physical release, which may never precede the countersignature. If any data change before release, the copy is cancelled and replaced by a new version for signature. The transaction timeline and related evidence are retained in the protected operational register.

From handover to return, the Signatory must keep the asset with due care, perform pre-use checks, store it at the agreed place and immediately report failures, incidents, loss, theft, recalls or defects. The Signatory must not attempt repairs, continue use or conceal the event. The asset and all accessories must be returned at expiry, when use ends or when return is requested under clause 6.

Return-stage record

The following block is completed upon return on the controlled copy or through a separate receipt referring to the Tool1 code. Where the status is “pending return”, the fields intentionally remain to be completed and do not attest that return has already occurred.

Stage status ☐ pending return ☐ returned and checked

Return date/time _____

Condition on return _____

Evidence / receipt _____

☐ The Parties acknowledge that the description, accessories and condition at handover are as recorded above, without prejudice to latent defects or defects not reasonably detectable.

The following lines are signed only upon return and do not form part of the initial handover record. Alternatively, the Parties may execute a separate receipt identifying the same Tool1 code.

Signatory acknowledgement upon return

Company acknowledgement upon return

5. Consumables, electricity and additional security deposit

Consumables: ☐ none ☐ supplied by the Signatory ☐ supplied by the Company free of charge ☐ reimbursement of documented cost only.

List and rules _____

Reimbursement cap € _____

Electricity: ☐ not required ☐ Signatory’s compliant, pre-authorised source ☐ ordinary Company supply without charge ☐ reimbursement of documented incremental cost only.

Outlet, power and rules _____

Reimbursement cap € _____

Additional security: € _____ ☐ not required ☐ pending credit ☐ received.

Credit deadline _____

Receipt / transaction _____

Reimbursement is due only for the items exactly listed, at documented actual cost and within the cap. If a valid selection, detail or cap is absent, no amount is due. The additional deposit is refundable, is not a price or use charge and does not authorise activity before it is credited. Deductions and set-off follow Att. F and clause 7; automatic forfeiture is not permitted.

6. Suspension, revocation and early return

The Signatory may stop use at any time and arrange early return. The Company may immediately suspend use and require the asset to be made safe or returned if there is a present danger, defect, recall, expired inspection, missing PPE or supervision, out-of-scope use, third-party access, failure to credit the security deposit or another documented breach. Outside urgency, early return may be required only where permitted by this form, the Reference Agreement, or law; the request must be communicated through a traceable channel and allow a reasonable period to stop use and return the asset. Art. 1809 of the Italian Civil Code remains applicable where its requirements are met, including an urgent and unforeseen need of the lender. Suspension and revocation operate prospectively, do not make prior use unlawful and do not extinguish rights or obligations already accrued.

7. Damage, ordinary wear and non-waivable liability

The Signatory is not liable for deterioration resulting solely from authorised use without fault, including ordinary wear consistent with duration, intensity and material worked (Art. 1807 of the Italian Civil Code). For damage, loss or missing items causally attributable to the Signatory’s intentional or negligent conduct, the Company may claim only direct, reasonable and documented costs: repair cost or, where repair is not technically or economically reasonable, the asset’s current value immediately before the event; in both cases net of ordinary wear, betterment, residual value, insurance proceeds, third-party recoveries and amounts already applied from the deposit. The notice must describe the event, causation, evidence and calculation and allow observations before set-off, subject to proportionate protective measures under Att. F. Double recovery of the same item is prohibited, and replacement with a newer asset of greater value must not produce a windfall. No term excludes or limits the Company’s liability for wilful misconduct, gross negligence, breach of public-order duties or other non-waivable liability; the Company’s own liability arising from custody, known defects, instructions actually given and conduct actually undertaken also remains unaffected (Art. 1229 of the Italian Civil Code). No general release or advance waiver by the Signatory is given.

8. No employment or professional classification

Tool1 grants only personal, optional and limited use of the asset within the lawful scope of Att. M. It assigns no duties, shifts, results, consideration or managerial authority and neither creates nor conceals employment, an internship, professional services, volunteering, contracted work or in-kind remuneration. An organised, directed or remunerated activity, or one performed in the Company’s productive interest, must be stopped and governed by the appropriate instrument. Classification depends on the actual facts and mandatory law and cannot be altered by this form.

9. Language, submission, signatures and document integrity

Only the Italian text may be completed, signed and executed. The English translation published on the website is provided solely for consultation and is not a separate signable form. The Signatory must not sign until the Italian text has been fully understood and may obtain an independent translation or advice before signing. The Company prepares the Italian copy identified by its Tool1 code and pre-populates only data already lawfully available; the Signatory completes the fields reserved to them without changing clauses, codes, asset data or Company determinations.

Signatory signature method ☐ handwritten with scan ☐ qualified/digital electronic

Attached identity document _____

Pre-assigned source-PDF identifier _____

For a handwritten signature, the signed copy is accompanied by a legible copy of a valid identity document, required solely for contractual identity verification. Alternatively, the Signatory uses a qualified/digital electronic signature in a suitable format. The identity document and personal data are transmitted only through the protected channel designated by the Company and processed only as necessary.

In the same matter, the Signatory sends to the certified e-mail address colivingliguria@pec.it: (a) the unaltered and unsigned Italian source PDF received from the Company, bearing the pre-assigned identifier stated above; and (b) the fully completed and signed Italian copy, as a legible scan if handwritten-signed or as a suitably electronically signed file. A handwritten signature is accompanied by the identity-document copy described in the preceding box. The signed copy's identifier and digest, certified-email receipts, verification of the Company's countersignature and the handover timeline are recorded after the respective events in the protected operational register and are not added to the already signed PDF. Submission of the source PDF alone, the Signatory's signature alone, the certified-email receipt, or the Company's graphic stamp leaves the matter pending and does not authorise handover or use. The Company verifies identity, completeness, integrity and consistency of the file and may not alter anything stated or requested by the Signatory after signature. Any material correction or supplement requires a new Italian copy and a fresh Signatory signature. The Company accepts by applying an actual, verifiable qualified electronic or digital signature to the same file already signed by the Signatory. The stamp reproduced in the signature box is solely graphic and identifying and does not replace that signature. Tool1 becomes effective only when every condition in clause 1 is satisfied and the Company's countersignature has been applied and verified before or simultaneously with the controlled handover; physical transfer may never precede it. The Company returns the unaltered countersigned file to the Signatory, and no signature has retroactive effect.

Specific approval of pre-drafted clauses

Pursuant to Arts. 1341 and 1342 of the Italian Civil Code, after review the Signatory specifically approves: clauses 1, 2, 4, 5, 6, 7 and 9: effectiveness conditions; use limits and third-party prohibition; delivery and return; costs and deposit; suspension and revocation; damage and liability; transmission, signatures, and document integrity.
